

# PERSON PUZZLE LAW OF COSINES

NAME \_\_\_\_\_ DATE \_\_\_\_\_

## MARIE CURIE

One of the most noteworthy scientists in history, Marie Curie (1867 – 1934) became the first woman to win a Nobel Prize. Curie's work helped overturn established scientific ideas and it had an equally profound effect as a barrier breaker for women. The winner of many awards, Curie gave away prize money and often refused the recognition. Albert Einstein is reported to have said that "[Curie] was probably the only person who could not be corrupted by fame."

**DIRECTIONS:** Use the Law of Cosines to find the indicated measurement. Round all answers to the nearest tenth. The word or phrase next to the correct response will complete the statement.

- Solve for  $a$*   
Marie Curie was born Warsaw, \_\_\_\_\_.

a.	11.9	Germany
b.	13.0	Poland
c.	46.8	Switzerland
- Solve for  $b$*   
Curie was not allowed to attend the men-only University of Warsaw and went to Warsaw's secret "\_\_\_\_\_ university".

a.	6.32	bootleg
b.	6.82	floating
c.	7.35	midnight
- Solve for  $a$*   
Eventually, Curie reenrolled at the Sorbonne University of Paris and earned a degree in \_\_\_\_\_.

a.	75.2	biology
b.	84.2	chemistry
c.	113.2	physics
- Solve for  $\angle C$*   
In 1898, Curie discovered new radioactive elements which they named \_\_\_\_\_ and radium.

a.	77.4°	francium
b.	51.3°	polonium
c.	46.8°	promethium
- Solve for  $\angle B$*   
In her research, Curie coined the term \_\_\_\_\_.

a.	136.1°	isotope
b.	133.4°	pitchblende
c.	130.3°	radioactivity
- Solve for  $\angle A$*   
After her first win for Physics, in 1911, Curie received her second Nobel Prize in \_\_\_\_\_.

a.	44.6°	Chemistry
b.	41.2°	Medicine
c.	39.5°	Physiology
- Solve for  $\angle C$*   
Curie refused to patent her \_\_\_\_\_ process so other scientists could do research for free.

a.	28.1°	atom-separation
b.	21.3°	isotope-splitting
c.	16.9°	radium-isolation
- Solve for  $\angle A$*   
During World War I, Curie developed mobile \_\_\_\_\_ (known as "Little Curies") to be used in the battlefield.

a.	56.2°	armored vehicles
b.	43.7°	missile launchers
c.	31.8°	x-ray machines

# SHOW YOUR WORK

1. Solve for  $a$

2. Solve for  $b$

3. Solve for  $a$

4. Solve for  $\angle C$

**MARIE  
CURIE**

5. Solve for  $\angle B$

6. Solve for  $\angle A$

7. Solve for  $\angle C$

8. Solve for  $\angle A$
